*Journal of The Institution of Structural Engineers*

**INDEX:** Volume 63B R&D Quarterly 1985

## A

Adhesives: A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture ..... 85
Aggarwal, A.K. and R.C. Coates: Damping in bolted beam-column connections under pulsating loads ..... 27
Alport, B.: See G.J. Krige, A.R. Kemp, B. Alport and M. Fotopoulos
Anandarajah, A. and A.E. Vardy: A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture ..... 85
Axial loads: Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending 34

## B

Balfour, J.A.D.: A comparison of analysis techniques for offshore platform cranes ..... 21
Bars: Section properties of thin walled bars of open cross-section ..... 63
Beams:
- Lateral stability of I-beams restrained by profiled sheeting 1
- A space truss model for fibre-concrete beams in torsion 14
- A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture ..... 85
- Deformation and cracking of post-tensioned brickwork beams ..... 93

Behaviour and design of mineshaft steelwork and conveyances 41
Bending:
- Damping in bolted beam-column connections under pulsating loads ..... 27
- Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending ..... 34

Besser, I.I.: See Cusens, A.R. and I.I. Besser
Bolts: Damping in bolted beam-column connections under pulsating loads ..... 27
Brickwork: Deformation and cracking of post-tensioned brickwork beams ..... 93
Bridges: Elastic behaviour of open sandwich bridge decks 8
Buckling: Lateral stability of I-beams restrained by profiled sheeting ..... 1

## C

Collapse: Design of ring stiffened cylinders under external pressure ..... 69
Coates, R.C.: See Aggarwal, A.K. and R.C. Coates
Columns: Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending 34
Compression: Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending 34
Computer aided design:
- Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending ..... 34
- Section properties of thin walled bars of open cross-section 63

Concrete:
- Elastic behaviour of open sandwich bridge decks ..... 8
- A space truss model for fibre-concrete beams in torsion 14
- Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending ..... 34
- Shear strength of reinforced concrete wall-beams under combined top and bottom loads ..... 50
- Shear combs, reinforcement against punching ..... 76

Connections: Damping in bolted beam-column connections under pulsating loads ..... 27
Cracks and cracking:
- Elastic behaviour of open sandwich bridge decks ..... 8
- Shear strength of reinforced concrete wall-beams under combined top and bottom loads ..... 50
- A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture ..... 85
- Deformation and cracking of post-tensioned brickwork beams ..... 93

Cranes: A comparison of analysis techniques for offshore platform cranes ..... 21
Cusens, A.R. and I.I. Besser: Shear strength of reinforced concrete wall-beams under combined top and bottom loads 50
Cylinders: Design of ring stiffened cylinders under external pressure ..... 69

## D

Damping in bolted beam-column connections under pulsating loads ..... 27
Darwish, I.Y.S.: See Narayanan, R. and I.Y.S. Darwish
Decks, concrete: Elastic behaviour of open sandwich bridge decks ..... 8
Deformation and cracking of post-tensioned brickwork beams 93
Design charts: Design of ring stiffened cylinders under external pressure ..... 69
Design, structural:
- Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending ..... 34
- The behaviour and design of mineshaft steelwork and conveyances ..... 41
- Design of ring stiffened cylinders under external pressure 69

Diaphragms:
Lateral stability of I-beams restrained by profiled sheeting 1
Design of ring stiffened cylinders under external pressure 69
Dynamic analysis:
A comparison of analysis techniques for offshore platform cranes 21
The behaviour and design of mineshaft steelwork and conveyances 41

E

Elastic-plastic analysis:
Elastic behaviour of open sandwich bridge decks 8
Damping in bolted beam-column connections under pulsating loads 27
Design of ring stiffened cylinders under external pressure 69
Endplates: Damping in bolted beam-column connections under pulsating loads 27

F

Failure:
Design of ring stiffened cylinders under external pressure 69
A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture 85
Fibre composites: A space truss model for fibre-concrete beams in torsion 14
Finite element analysis: A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture 85
Fotopoulos, M.: See Krige, G.J., A.R. Kemp, B. Alport and M. Fotopoulos
Fracture: A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture 85

G

Girders: Strength of slender webs having non-central holes 57
—Corrigenda 92

H

Harding: See Tsang, S.K. and J.E. Harding

I

Iterative method: Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending 34

J

Joints: Damping in bolted beam-column connections under pulsating loads 27

K

Kareem-Palanjian, A.S.: See Narayanan, R. and A.S. Kareem-Palanjian
Kemp, A.R.: See Krige, G.J., A.R. Kemp, B. Alport and M. Fotopoulos
Krige, G.J., A.R. Kemp, B. Alport and M. Fotopoulos: The behaviour and design of mineshaft steelwork and conveyances 41
Kwan, K.H. and T.C. Liauw: Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending 34

L

Lateral stability of I-beams restrained by profiled sheeting 1
Liauw, T.C.: See Kwan, K.H. and T.C. Liauw
Lawson, R.M. and D.A. Nethercot: Lateral stability of I-beams restrained by profiled sheeting 1
Limit state design: Lateral stability of I-beams restrained by profiled sheeting 1
Load distribution: Elastic behaviour of open sandwich bridge decks 8
Load tests:
Lateral stability of I-beams restrained by profiled sheeting 1
Damping in bolted beam-column connections under pulsating loads 27
The behaviour and design of mineshaft steelwork and conveyances 41
Shear strength of reinforced concrete wall-beams under combined top and bottom loads 50
Strength of slender webs having non-central holes 57
—Corrigenda 92
Loading:
Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending 34
Deformation and cracking of post-tensioned brickwork beams 93

M

Measurement apparatus: The behaviour and design of mineshaft steelwork and conveyances 41
Mineshaft steelwork and conveyances: behaviour and design 41
Model tests: Strength of slender webs having non-central holes 57
—Corrigenda 92

N

Narayanan, R. and I.S. Darwish: Strength of slender webs having non-central holes 57
—Corrigenda 92
Narayanan, R. and A.S. Kareem-Palanjian: A space truss model for fibre-concrete beams in torsion 14
Nethercot, D.A.: See Lawson, R.M. and D.A. Nethercot
Numerical analysis: A comparison of analysis techniques for offshore platform cranes 21

O

Offshore structures:
A comparison of analysis techniques for offshore platform cranes 21
Design of ring stiffened cylinders under external pressure 69
Open sandwich beams: theoretical investigation of failure due to interfacial shear fracture 85
Optical measurement: Damping in bolted beam-column connections under pulsating loads 27

P

Pedreschi, R.F. and B.P. Sinha: Deformation and cracking of post-tensioned brickwork beams 93
Plates: Strength of slender webs having non-central holes 57
—Corrigenda 92
Post-tensioned brickwork beams: deformation and cracking 93
Pressure vessels: Design of ring stiffened cylinders under external pressure 69
Programming:
A comparison of analysis techniques for offshore platform cranes 21
The behaviour and design of mineshaft steelwork and conveyances 41
Punching: Shear combs, reinforcement against punching 76

R

Regan, P.E.: Shear combs, reinforcement against punching 76

Reinforcement:
Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending ..... 34
Shear strength of reinforced concrete wall-beams under combined top and bottom loads ..... 50
Shear combs, reinforcement against punching ..... 76
Rings: Design of ring stiffened cylinders under external pressure ..... 69
Roberts, R.M.: Section properties of thin walled bars of open cross-section ..... 63
Roofs: Lateral stability of I-beams restrained by profiled sheeting ..... 1

## S

Sandwich construction:
Elastic behaviour of open sandwich bridge decks ..... 8
A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture ..... 85
Section properties of thin walled bars of open cross-section 63
Shear:
Lateral stability of I-beams restrained by profiled sheeting 1
Damping in bolted beam-column connections under pulsating loads ..... 50
Shear strength of reinforced concrete wall-beams under combined top and bottom loads ..... 50
Strength of slender webs having non-central holes ..... 57
—Corrigenda 92
A theoretical investigation of the failure of open sandwich beams due to interfacial shear fracture ..... 85
Sheeting: Lateral stability of I-beams restrained by profiled sheeting ..... 1
Shells: Design of ring stiffened cylinders under external pressure ..... 69
Sinha, B.P.: See Pedreschi, R.F. and B.P. Sinha
Skips: The behaviour and design of mineshaft steelwork and conveyances ..... 41
Slabs:
Elastic behaviour of open sandwich bridge decks ..... 8
Shear combs, reinforcement against punching ..... 76
Space truss model for fibre-concrete beams in torsion ..... 14
Stability: Lateral stability of I-beams restrained by profiled sheeting ..... 1
Steel structures: The behaviour and design of mineshaft steelwork and conveyances ..... 41
Stiffeners: Design of ring stiffened cylinders under external pressure ..... 69
Strength:
A space truss model for fibre-concrete beams in torsion 14
Computer aided design of reinforced concrete members subjected to axial compression and biaxial bending ..... 34
Shear strength of reinforced concrete wall-beams under combined top and bottom loads ..... 50
Strength of slender webs having non-central holes ..... 57
—Corrigenda 92
Stresses and strains:
Elastic behaviour of open sandwich bridge decks ..... 8
Deformation and cracking of post-tensioned brickwork beams ..... 93

## T

Torsion: A space truss model for fibre-concrete beams in torsion 14
Tsang, S.K. and J.E. Harding: Design of ring stiffened cylinders under external pressure ..... 69

## U

Underground structures: The behaviour and design of mineshaft steelwork and conveyances ..... 41

## V

Vardy, A.E.: See Anandarajah, A. and A.E. Vardy; Wong, C.C.K. and A.E. Vardy
Vibration:
Damping in bolted beam-column connections under pulsating loads ..... 27

## W

Wall-beams: Shear strength of reinforced concrete wall-beams under combined top and bottom loads ..... 50
Warping constants: Section properties of thin walled bars of open cross-section ..... 63
Webs: Strength of slender webs having non-central holes 57
—Corrigenda 92
Wong, C.C.K. and A.E. Vardy: Elastic behaviour of open sandwich bridge decks ..... 8

warners (Midlands) plc., The Maltings, Bourne, Lincs. and Suite 108, Temple Chambers, Temple Avenue, London E.C.4.
